25X1.1. Introduction

a. The following strength estimate of Soviet ground forces breaks down each army, including rear services of division and below, into component combat units (para 2 and 3). The rear services above division level are estimated at 7 percent of the total strength of combat units and supporting GHQ units for the entire Group of Occupation Forces (para 4).

b. Information on the present actual strength varies between 65 percent and 85 percent as compared with the estimated T/O strength. According to most indications [redacted] on the 39th Gds Rifle Div 75 percent is taken as the average percentage.

c. The present strength of the filled up cadre units is calculated at 88 percent of the full units [redacted]

The former cadre divisions may not have been filled up to the same degree (10th Gds and 25th Tank Div are still weak) but 88 percent has been taken as the only reasonable estimate, though it may be somewhat high.

d. Very rough estimates of the Soviet Control Commission (para 7), the Air Force (para 8), the Navy (para 9), and the MVD/MGB (para 10) personnel are given herein, although the information available does not provide a firm basis for these figures.

6. Total strength of Soviet Ground Forces in Germany
(without Soviet Control Commission):

Total of paras 4 and 5:	249,000 (approximate)
-------------------------	--------------------------

7. Soviet Control Commission in Germany

Information available on the reduction of the former SMA personnel is not sufficient to justify an estimate of the present strength of the Soviet Control Commission.

By detailed calculation of March 1949 the total strength of SMA personnel (including military personnel within railroad directorates, Soviet stock companies, and dismantling offices) was estimated at 23,000.

The reorganization into offices of the Soviet Control Commission is still going on. Scanty information indicates that this reorganization effects a considerable reduction which may amount to about 60 to 70 percent.

Present Soviet Control Commission personnel may be roughly estimated at:	7,000
---	-------

8. Soviet Air Force in Germany

The total personnel of combat and air-technical units of the Twenty-Fourth Air Army is estimated at:	34,000
---	--------

Other personnel in air force schools, research institutes, supply dumps, and liaison staffs are estimated at:	<u>6,000</u>
---	--------------

Estimated total Soviet Air Force personnel in Germany:	40,000
---	--------

9. Coastal personnel of the Soviet Navy in Germany

Rough estimate of harbor, coast guard, and liaison personnel	2,000
